

SNEHA SAHA

Backend Developer | Spring Boot | REST APIs | Software Tester

Kolkata, West Bengal, India • [9123822426](tel:9123822426) • sahasneha773@gmail.com • [SnehaSaha14 \(Sneha Saha\)](#) · [GitHub](#)

PROFESSIONAL SUMMARY

Highly analytical Java and Python Backend Developer (BCA 2026, Aggregate SGPA: 7.75) with solid engineering foundations across the Software Development Life Cycle (SDLC). Hands-on experience developing secure RESTful interfaces utilizing Spring Boot, Spring Data JPA, and FastAPI alongside MySQL and MongoDB. Demonstrated competency in database schema normalization, exception handling architectures.

TECHNICAL SKILLS

Languages: Java (Core & Advanced), SQL, Python (Fundamentals)

Frameworks & Architecture: Spring Boot (v3.x), Spring Data JPA, Hibernate ORM, FastAPI, Servlets, MVC Layered Architecture

Databases & Cloud Storage: MySQL, MongoDB, DynamoDB, MongoDB Atlas Cloud Environment.

Testing & Developer Tools: Postman, Swapper/OpenAPI, Git, GitHub, Maven Build Automation, Power BI.

Core Computer Science: Object-Oriented Programming (OOPs), DBMS, Data Structures & Algorithms, SDLC, Debugging, Unix Shell Commands, Agile.

TECHNICAL PROJECTS

Banking System Backend Architecture

<https://github.com/SnehaSaha14/BankingApplication>

Tech Stack: Spring Boot, Java 21, MySQL, Spring Data JPA, Hibernate, Postman

- Architected a secure banking backend handling core account initialization and secure atomic fund transfers.
- Designed a Normalized Relational Database Schema in MySQL to ensure strict data integrity and eliminate redundancy.
- Enforced ACID-compliant logic using Spring Transaction Management to prevent data corruption under concurrent loads.
- Conducted comprehensive API black-box testing via Postman to validate edge cases, boundaries, and response structures.

Automated Expense Tracker

<https://github.com/SnehaSaha14/expense-tracker>

Tech Stack: Spring Boot, Java 17, MySQL, Spring Data JPA, Hibernate ORM, MVC

- Engineered a robust expense tracking backend supporting multi-entity relations and full CRUD operations.
- Structured the application using a strict Layered MVC Architecture to maximize code decoupling and maintainability.
- Implemented global, centralized exception management via `@ControllerAdvice` to standardize REST API error responses.
- Utilized Hibernate ORM framework to optimize relational database table linkages and entity state queries.

User Management System

<https://github.com/SnehaSaha14/FastApi>

Tech Stack: FastAPI, Python, MongoDB Atlas, Swagger UI / OpenAPI Spec

- Developed high-throughput, non-blocking REST APIs utilizing FastAPI's native asynchronous execution loops.
- Integrated cloud-hosted MongoDB Atlas document store with structured validation schemas for accelerated lookups.
- Leveraged built-in Swagger UI and OpenAPI specifications to maintain real-time interactive endpoint documentation.

PROFESSIONAL EXPERIENCE

Techno Exponent

Jun 2025 – Sep 2025

Data Analytics Intern

- Engineered interactive Power BI dashboards from structured datasets to deliver clean, actionable business insights.
- Formulated data cleansing workflows in Power Query and wrote DAX scripts to analyze performance and map edge cases.
- Collaborated with engineering stakeholders to cross-validate source data, reducing pipeline data integrity errors.

EDUCATION

Bachelor of Computer Applications (BCA)

Expected June 2026

Bengal School of Technology & Management (MAKAUT), Kolkata • **Aggregate SGPA:** 7.75

Higher Secondary Examination (Class XII - CBSE)

2023

Aditya Birla Vani Bharati • **Aggregate Percentage:** 60.0%

Secondary Examination (Class X - WBBSE)

2021

Aditya Birla Vani Bharati • **Aggregate Percentage:** 76.0%
